

Truck Equipment

The following equipment is required on all Club trips, although generally an exception is made for visitors and prospective members on "Family Shiny" trips only.

- Seatbelts or harnesses
- Front and rear tow hooks
- Shovel
- Fire extinguisher 2kg (1x2kg is minimum requirement for forestry trips)
- First-aid kit
- Basic tool kit
- Snatch Rope/Strop
- Roll bar for all open / soft top vehicles
- Spare tyre and tyre changing equipment

We recommend that all drivers have either hand held or vehicle mounted PRS radios.

And please note that vehicles with winches also need the safety gear to go with them and mounted properly.

Pulleys are handy, tree protectors, wire dampeners and that sort of safety equipment should not be over looked, be in the vehicle and be looked after.

Any questions, please contact the club on rodneyoffroad@gmail.com.
